

TECHNICAL DATA SHEET

JOKISCH FOSIA DERMA PROTECT (Jokisch Derma Protect)

Protective lotion with dual effect.

APPLICATION

In the case of frequently changing or not clearly defined skin hazards as well as in the case of mechanical stress on the skin, e.g. by means of tools, glass fibers, wire wool or cardboard.

1. Apply carefully, before the beginning of the work and after the brakes, to the previously cleaned skin parts.
2. Attention should be paid to particularly vulnerable skin areas, e.g. between the fingers and the nails.
3. For longer work intervals the application should be repeated.

CHARACTERISTICS

The O/W emulsion is free of silicone oil and leaves no traces on workpieces or tools.

- Has a firming effect on the skin
- Reduces the skin strain
- Supports the natural regeneration ability of the skin
- Silicone-free
